European Journal of Operational Research 56 (1992) 424–425
North-Holland

Contents Volume 56

1 Editorial
A. Mercer, B. Tilanus and H.-J. Zimmermann
2 Packing problems (*Invited Review*)
K.A. Dowsland and W.B. Dowsland
15 Developing an expert support system for tender enquiry evaluation: A case study
G.J. Phythian and M. King
30 Multicriterion issues in energy policymaking
R. Karni, P. Feigin and A. Breiner
41 Insufficient supply in a natural gas distribution system: A risk analysis
C. Haehling von Lanzenauer, W.G. James and D.D. Wright
54 Understanding the competitive process. A guide to effective intervention in the small firms sector
M. Horne, P. Lloyd, J. Pay and P. Roe
67 Information reliability and the prediction of bankruptcy
D.E. O'Leary
80 Estimating preferred target input-output levels using data envelopment analysis
E. Thanassoulis and R.G. Dyson
98 Stochastic modeling of security returns: Evidence from the Helsinki Stock Exchange
G.G. Booth, J. Hatem, I. Virtanen and P. Yli-Olli
107 Multi-period production control in a centralized fully flexible manufacturing system
J.J. Liu
119 Applying a modified coefficient reduction method to a dynamic production scheduling model
M. Guignard and M.J. Liberatore
131 OR Software, *H. Thiriez*

Special Issue on Optimizing Public Policy
133 Editorial
H. Wallenius and J. Wallenius
134 A 0-1 nonlinear programming model for coast guard fisheries law enforcement aircraft patrols
R.L. Armacost
146 Optimizing the level of grant support for local government: An application of a behavioural model
R.R. Barnett, R. Levaggi and P. Smith
154 Using game theory to analyze electric transmission pricing policies in the United States
B.F. Hobbs and K.A. Kelly
172 Decision support for risk analysis in energy policy
R.P. Hämäläinen and R. Karjalainen
184 The Afforestation Problem: A heuristic method based on simulated annealing
R.M. Jørgensen, H. Thomsen and R.V.V. Vidal
192 Investment and harvest strateties of the Finnish forest sector under different forest-tax policies: A differential game approach with computer-based decision aid
H. Kivijärvi and M. Soismaa
210 Multiple objective analysis of long-term development strategies for a national economy
A. Lotov, O. Chernykh and O. Hellman
219 Multiple-criteria robust interactive decision analysis (MCRID) for optimizing public policies
H. Moskowitz, P.V. Preckel and A. Yang
237 OR in energy planning for a small country
E.G. Read, J.G. Culy and S.J. Gale
249 Ordinal data in multicriteria decision making, a stochastic dominance approach to siting nuclear power plants
P. Rietveld and H. Ouwersloot
263 Transboundary air pollution in Europe: An interactive multicriteria tradeoff analysis
A. Stam, M. Kuula and H. Cesar
278 Interactive multiobjective analysis and assimilative capacity-based ocean disposal decisions
T.M. Leschine, H. Wallenius and W.A. Verdini

278 Interactive multiobjective analysis and assimilative capacity-based ocean disposal decisions
T.M. Leschine, H. Wallenius and W.A. Verdini

291 Strategies for service systems (*Invited Review*)
S.P. Siferd, W.C. Benton and L.P. Ritzman
304 The optimisation of defence expenditure
R.G. Coyle
319 Measuring the quality of computer model performance
D.E. O'Leary
332 Estimating reorder points and other management science applications by bootstrap procedure
M.-C. Wang and S.S. Rao
343 An in-depth empirical investigation of non-greedy approaches for the minimum spanning tree problem
F. Glover, D. Klingman, R. Krishnan and R. Padman
357 Multiobjective, preference-based search in acyclic OR-graphs
C.C. White III, B.S. Stewart and R.L. Carraway
364 Minimum loss scheduling problems
W.M. Nawijn
370 An iterative scheduling technique for resource-constrained project scheduling
K.Y. Li and R.J. Willis
380 A comparative study of interactive tradeoff cutting plane methods for MOMP
W.S. Shin and A. Ravindran
394 A linear algebraic formulation of the performance sensitivities of queueing networks
X.-R. Cao
407 The stochastic vehicle routing problem revisited
C. Bastian and A.H.G. Rinnooy Kan
413 A control policy for replacement involving two machines and one repairman
J. Noh, S.-J. Kang and R.M. Feldman
423 OR Software, *H.W. Hamacher (ed.)*
424 Contents Volume 56
